

Sextortion: Be careful when flirting in front of a webcam!

If strangers start flirting with you on Facebook, WhatsApp, etc., or your partner wants to change to Skype?

X Attention:
This is probably a trap!

Has someone asked you to perform sexual acts or to send a nude picture?

Nevertheless, the situation is very suspicious. Still be careful!

Check if you covered up your webcam (E.g. with a sticker!) **?**

This is how you can limit the damage: **i**

Has someone threatened to publish images of you, if you don't pay money or send more images?

End the contact immediately!

Does your partner switch on the webcam immediately and get straight to the point? **YES**

Don't transfer money! Often the blackmail will continue after the first payment!

That was a close shave! Remember: If someone "gets down to business" very quickly, you can be pretty sure that's a bit fishy. **👍**

In case photos/videos of you appear on the internet: Ask the website operators to take them down. If this is not possible contact your SIC helpline.

Search regularly for your name online!
